Soft skills.

- ... Ability to solve problems
- ... Proactive
- ... Team work
- ... Creative
- ... Self-management capacity
- ... Goal oriented
- ... Responsible
- ... Effective communication
- ... Flexible in methods and frameworks
- ... Learning capacity
- ... Collaborative and participatory attitude

Personal profile

I am recent graduate of the Computer Science Engineering program at the University of Costa Rica. I am a passionate computer scientist with a strong background in programming and a solution-oriented approach. My experience in university projects and internships has provided me with practical understanding of agile development principles and solving complex problems. I am a quick learner, eager to contribute and grow as part of an innovative development team.

Technical Skills:

Operating systems.

- Windows.
- Linux.

Development technologies

- Java, C# .NET, JavaScript, HTML and CSS.
- Node (Express)
- React (Vite, Remix, Redux, Next and React Native)
- Python

Database management

- SQL Server.
- MySQL.
- MongoDB

Version management

- GitHub

Others

- Modeling, documentation, SCRUM methodology, object-oriented programming.
- Creation of MERN Stack Project with MVC Architecture

Other skills

- I have carried out several projects throughout my university stage, including complete developments implementing agile methodologies such as SCRUM.

Work experience

- Junior Developer
- H&CO (July 15, 2022 - July 28, 2023): I completed my professional internship at H&CO for 6 months as a junior developer using React and Node. Later, I was responsible for implementing applications on cloud platforms.

Education

University of Costa Rica

Bachelor of Business Informatics

Intensa S.A

Certified as B2

Smart Data

Data Science Specialization with Python

INA

Azure Fundaments
